Managing Director
Council for Tobacco Research, USA, Inc.
900 Third Avenue
New York, NY 10022

Dear Sir or Madam:

I am a cardiac electrophysiologist interested in the treatment and prevention of sudden cardiac death. To this end, my laboratory is actively seeking to establish the basis of the underlying arrhythmias and attempting to elucidate potential new avenues for therapy of these rhythm disturbances using molecular as well as conventional techniques. I would like to apply for research support, and would appreciate your sending me information regarding the types of research programs that your Council supports.

Sincerely yours,

Harold C. Strauss, M.D.
Professor of Medicine and Pharmacology

HCS/shw
